DATA SCIENTIST SUMMARY

- Leveraging 5+ years of experience in data science, specializing in predictive modeling to improve decision-making accuracy by 40%.
- Achieved a 20% increase in revenue for Tech Innovations Inc. through optimized pricing models.
- Reduced data processing time by 30% at Global Analytics, enhancing efficiency.
- Volunteer math tutor for underprivileged students.

WORK EXPERIENCE

DATA SCIENTIST

May 2019 - Present

Tech Innovations Inc.

- Led the development and implementation of a dynamic pricing model using Python, resulting in a 20% YoY revenue.
- Collaborated with cross-functional teams to integrate machine learning algorithms into the company's main product, increasing user engagement by 15%.
- Presented data-driven insights to stakeholders, influencing strategic decisions and contributing to a 10% reduction in operational costs.

JUNIOR DATA SCIENTIST

July 2016 - April 2019

Global Analytics

- Implemented an optimized data processing pipeline, reducing processing times by 30% and significantly improving data quality for analysis. Used Python for scripting.
- Developed predictive models for customer behavior that informed marketing strategies, leading to a 12% increase in customer retention. Applied R for statistical analysis.
- Conducted A/B testing for website optimization, which enhanced user experience and increased conversion rates by 8%. SQL was used for data querying.

INTERN

September 2015 - June 2016

Data Solutions

- Assisted in analyzing large datasets using Python to identify trends and insights, supporting project teams in making data-informed decisions.
- Contributed to the development of an internal tool for automated data cleaning, which increased the team's productivity by 20%.
- Prepared and presented reports on market research findings to senior management, receiving commendation for accuracy and insightfulness.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

September 2009 - May 2013

University of Chicago

SKILLS

Python

SQL

R

Product
